

# Hybrid Distribution Node Mounting Frame

Mounting Frame for the Hexatronic InOne System

## Features

- 4U, 19" frame
- Suitable for both power and fiber termination modules
- Handles rectifiers and redundancy controllers
- Internal DIN-rail mount

## Application

The mounting frame for the Hexatronic InOne Hybrid Distribution Node handles all necessary components for power feeding and fiber termination of the InOne fiber cables. Hybrid termination panels (hybrid ODFs), power rectifiers and redundancy controllers are easily arranged in the same frame module.

## Design

The mounting frame is designed for mounting into 19" frames. Power and fiber termination modules are mounted in the integrated DIN-rail. The frame is delivered with a protective transparent cover.
