

Fibre Optic Launch Leads are utilised when employing OTDR network testing to overcome the errors associated with inserting the tested cable directly into the OTDR unit. By providing a buffer zone, the launch lead enables accurate loss measurements throughout the link.

## KEY FEATURES

- Crush proof, robust IP67 case ensures fibre safety during transport and storage even in harsh environments
- Wide range of Telcordia GR326 compliant connector variants available
- Launch solutions for both singlemode and multimode fibre available
- Unit can be optioned with up to 1000m of fibre cable
- Can be employed to meet testing standards as set out in ISO/IEC 14763-3:2006

### Application

- OTDR launch lead/pulse suppressor
- OTDR calibration & testing
- Emulation of loss, length, time delay & reflectance

### Technical Specifications

Operating Temp (°C)	- 20 to + 60			
Fibre mode	OM1	OM3	OM4	OS1/2
Insertion loss (max dB)	0.30	0.30	0.30	0.25
Insertion loss (avg dB)	0.15	0.15	0.15	0.18
Insertion loss (rdm dB)	0.20	0.20	0.20	0.18
Return loss (db)	N/A	N/A	N/A	APC: >65 PC: >50
