

Distribution Series Fibre Optic Cable

Distribution series cable is ideal for installations requiring a flexible, lightweight and reliable cable design where excellent mechanical and environmental protection remain necessary.

The balance between compact size and rugged construction make distribution the preferred cable for many preterminated cable assemblies or site terminated fibre networks.

KEY FEATURES

- Low smoke, zero halogen jacket and materials
- High performance components and construction
- Complies with relevant ITU, IEC and UL codes, standards & specifications
- High strength to weight ratio allows for easy handling
- Aramid yarn strength member and all dielectric cable construction
- 900um buffer eliminates the need for costly and time consuming fanout kits or pigtail splices because connectors terminate directly to the fibre
- Cable materials are indoor/outdoor – UV, water and fungus resistant
- Wide operating temperature range of -20°C to +70°C
- 2 to 24 fibres

Application

- Suitable for indoor/outdoor confined spaces
- Building risers
- Cable trays
- Central offices
- Campus networks
