

## Features and Benefits

The PowerCat 6 MOD-Clip DataGate jack is designed to maintain clean secure connections. The RJ-45 jack features a patented 'spring-loaded shutter' which protects it from dust and contaminants as well as provides tactile feedback – the spring-loaded shutter pops out an improperly seated patch cord – all with single-handed plug-in and removal.

The MOD-Clip DataGate jacks utilise patented IDC V-shaped contacts that flex not fatigue when terminated and is uniquely designed to allow for rear and side entry cable termination. The provision of side entry termination ensures bend radius is maintained in installations where there is limited space - optimising the performance of your Category 6 solution.

The MOD-Clip DataGate jack is engineered for use with Clipsal®, HPM® and PDL® wallplate systems.

- **Patented Spring-Loaded Shutter:**
  - prevents incomplete mating
  - protects from dust and contaminants
- **Patented IDC V-shaped contacts** that flex not fatigue when terminated
- **Features pointed IDC towers** to speed termination and enhance cable retention
- **Dual colour-coding** allows for 568 A/B wiring configuration
- **Can be terminated** using industry standard punchdown tools
- **RJ-11 & RJ-12 compatible**
- **Suitable for use** within Clipsal, HPM and PDL system of wallplates
