

1RU 24 Port Keystone Patch Panel

CCS® Patch Panel for STP and UTP Jacks

Features

- Suitable for shielded or unshielded outlets
- Standard keystone compatible ports
- 24 port density in 1RU
- Plastic label holders for port identification
- Rear cable management

Application

This Keystone Patch Panel accommodates up to 24 standard keystone outlets and is suitable as an aggregation for structured cabling throughout a site or as a remote patch panel in a distributed building network. Patch panels are designed for installation into 19" rackmount frames, cabinets and racks.

Product Information

Each patch panel is constructed out of steel with a black finish. The rear of the panel is conductive and suitable for the grounding of shielded outlets. The facia houses plastic label holders for port identification and the rear of the panel holds a cable management bar for retaining incoming cabling.
