

FEATURES AND SPECIFICATIONS

molex® Universal Splice Tray

Features and Benefits

The Universal Splice Tray is a configurable enclosure for both mechanical and fusion splices. The tray is supplied with two fusion splice sleeves and two mechanical splice sleeves.

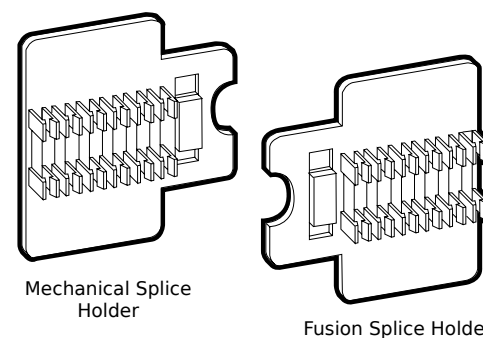

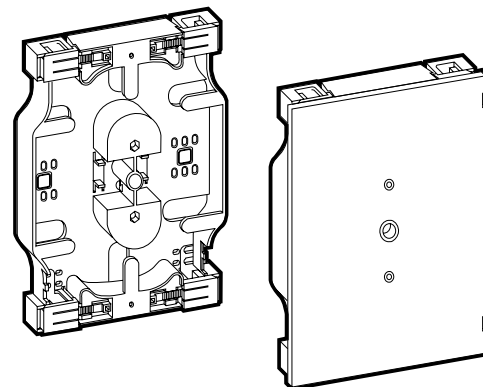

Loose tube cable is routed into and out of the tray through adjustable tube grips located at each corner. The tube grips eliminate the need for separate cable ties and are easily tightened and loosened in order to prevent overcompression of the loose tube cable.

- Two splice tray versions available.
 - 12 Fibre Splice Tray
 - 24 Fibre Splice Tray
- Allows for easy tightening and loosening which prevents over-compression of the fibre cable
- Fibre is routed through unique adjustable tube grips at each corner, eliminating the need for separate cable ties
